

New Products and SKUs – Fall 2021

---

## New Product Launch – i Series

---

*i White*

*i Silver*

*i Red*

*i Blue*

*i Bronze*

*i Black*

### About i Series

---

The stylish appearance of brushed metal and a gorgeous high-gloss finish make our i Series stand out as an excellent decorative cabinet option. The combination of the metallic pattern, vibrancy of color, and glossy surface create an iridescent look that enhances the beauty in any space.

### Product Details

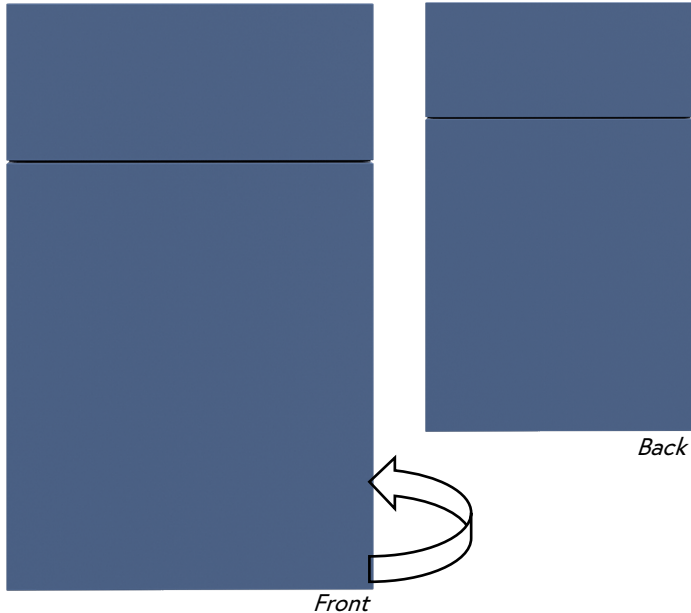

---

- Available in 6 finishes
- Door Style Options: DS1, DS1mb, DS5f
- The back of the DS1 doors will match the box interior (Folkstone Grey or Rainier White)
- Doors are laser edgebanded
- Cleanroom lamination

---

## New Product Launch – DS1mb

---

### About DS1mb

Introducing the DS1mb door style! Just like the DS1, it is a slab door, however the 'mb' stands for 'matching back' so the door will have the same finish on both sides.

### Product Details

Available in the Reflection, Optimat, and i Series (The DS1 Shift door is already double sided)

door and drawers*

---

## New – Drawer Glide Policy

---

Due to the Global Supply Chain issues in the cabinet hardware market, we are moving to a multi-vendor supply policy for our standard glides. While we will make every effort to build cabinet with Blum's Tandem Glide, we may, from time to time, use other suppliers to fill any shortcomings from Blum.

Any glides used will have a lifetime warranty and will have the following performance characteristics.

- Full Extension
- Soft-Close
- Minimum 90 lb. Dynamic load rating

We will not mix any glides on a single order and to ensure that your entire project includes glides from the same vendor, be sure to put the entire project on one order. With our online ordering system, it is okay to order multiple doorstyles, drawer styles and finishes on one order.

To distinguish the different rooms/locations on your order (Kitchen Island, Kitchen Perimeter, Bathroom, etc..) please utilize the "Shipping Label/Tag" and/or the "Field/Design Notes" fields.
